

# English Project

*What do you know about recycling?*

*What happens to your garbage?*

**LIXO ZERO**  
Um projeto que é nota dez no Colégio Catarinense

# Why is it important to recycle?

Recycling is important because if we recycle we help saving the environment, for example, the wild animals, forests, oceans, etc...

Recycling our garbage helps the planet to get less polluted, and just simple actions like putting your trash in the dump can help lives! Why? Because if you throw everything in the street, for example, if it rains too much, the drains and sewers will be clogged of trash, and there will be floods and overflows!

We have to help the world! We're the future of the nation!

## WE CHOSE: Paper

### Why should we recycle paper?

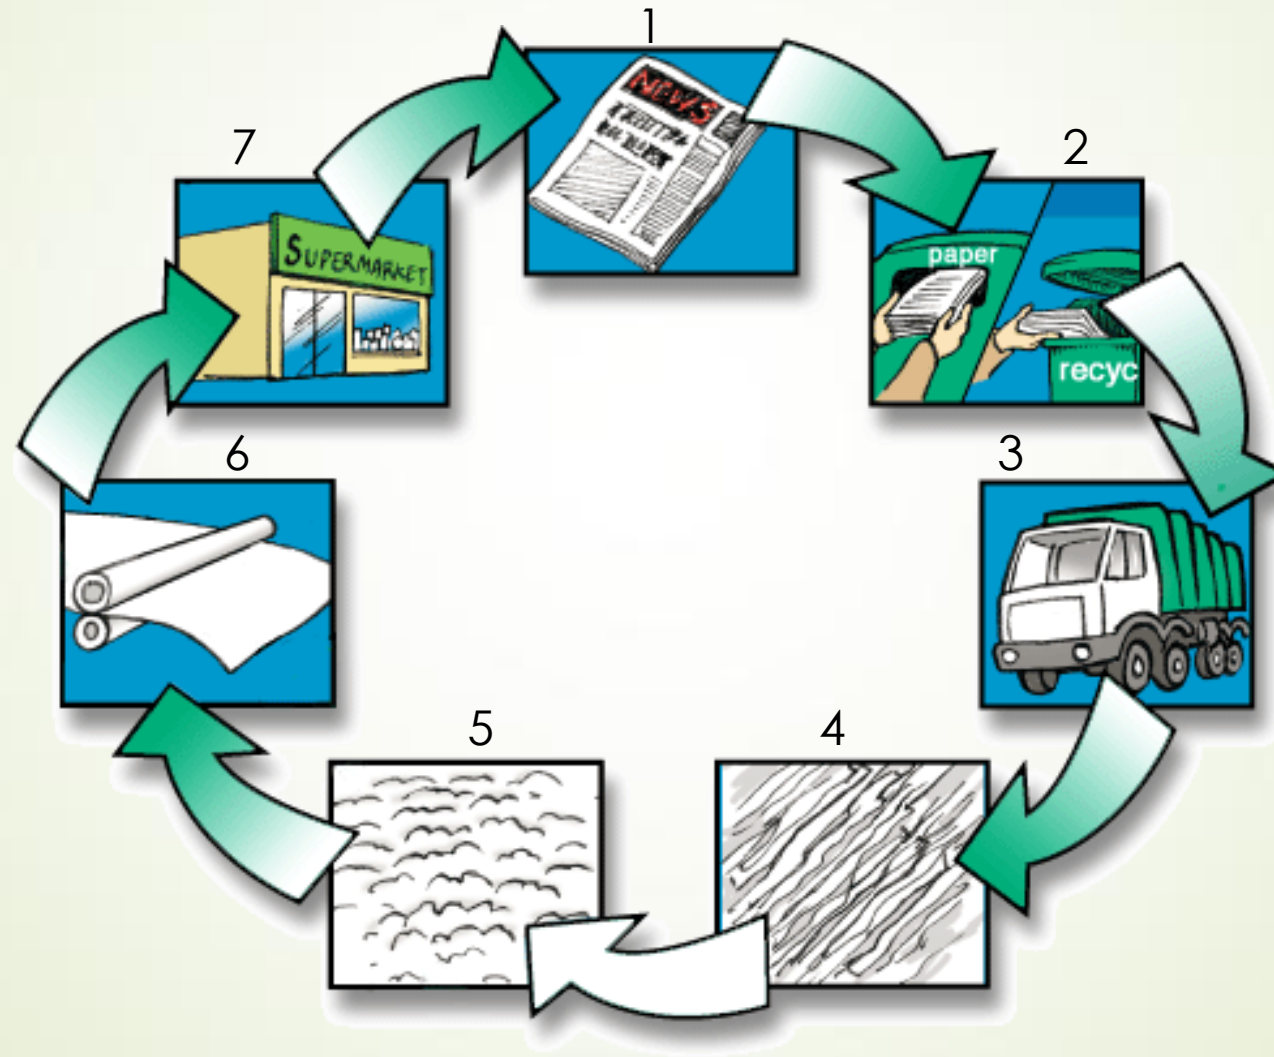

Because we can make lots and lots of things with it, like things for school, offices, medicine and technology, household, buildings and automotive, recreation and miscellaneous...

The masterpiece for producing paper is getting really scarce too, so using both sides of the paper can help a lot.

Well, and recycling paper can help lots of trees!

What usually happens to paper?

# Step by step:

- ❖ 1 – Paper goes to the recycling dump;
- ❖ 2 – The garbage truck brings the paper to the factory;
- ❖ 3 – The paper is separated, mixed with water, has its paint removed and it's cleaned;
- ❖ 4 – The paper is dried;
- ❖ 5 – It's smoothed and separated again;
- ❖ 6 – It goes to stores, supermarkets, shopping malls, etc, in different forms, like newspaper, magazines, comics...;
- ❖ 7 – It's sold and the process starts again.

# What can it become when its recycled?

- ❖ - Recycled paper sheets;
  - ❖ - Crafts;
  - ❖ - Documents;
  - ❖ - Newspaper, magazines, comics...;
  - ❖ - School Supplies;
  - ❖ - Designer clothes;
  - ❖ - Accessories;
  - ❖ School tests and work sheets;
  - ❖ Money and others.
-
